

Temperature control made simple

bürkert
FLUID CONTROL SYSTEMS

FEELING THE HEAT? RELAX, WE'VE GOT IT COVERED.

Flexible, reliable and ready-to-use, our Modular Process Control Platform makes process heating and cooling incredibly effortless. Based on your injection molding or extrusion requirements, we configure a solution that's utterly reliable: temperature-resistant up to 200°C (392 °F), no moving parts, and a dynamic range of 1:200. Benefit from a complete control loop manufactured by fluid experts – it saves you valuable engineering and assembly time. Leave temperature control to us, and take it easy.

Modular valve system for variotherm temperature control in injection molding.

Multi-channel flow control loop for temperature control in extrusion, injection molding and pressure-casting processes.
